TO: Minerals File

FROM: Tony Gallegos, Reclamation Engineer *aa*

RE: Site Inspection, Rock Asphalt Company, State Lease 7920, S/047/055, Uintah County, Utah

Date of Inspection: May 15, 1997
Time of Inspection: 1715 - 1740
Conditions: Windy, overcast, then raining
Participants: Tony Gallegos - DOGM; Pete Sokolosky, BLM - observing only

Purpose of Inspection: To examine the status of reclamation at this state mineral lease.

Upon arriving at this site there was a storm front with several showers that precluded a very long site visit. Photographs were taken of the general area. Some minor erosion was noted on the north end of the project site. The outcrop or the mound of asphalt in the center of this site is still in place. Visible vegetation at this time included tumbleweeds blowing through the storm. The lower area was not visited due to the slick and wet road conditions. A more thorough site inspection will need to be performed at another date.

Note: Division files indicate this site was reclaimed in December 1995; therefore, the site would be a candidate for full release during the fall of 1998 or spring of 1999.
